

Composting Toilet User Instructions

1. Open the lid.
2. Use the toilet. As with a normal toilet, you can put toilet paper in the toilet chamber.
3. After each visit, add a scoopful (0.3 litres) of bulking material in the toilet chamber.
4. Close the lid.

You can also use Biolan Composting Toilet to dispose of organic kitchen waste, such as food leftovers, coffee filters and fruit peels. Just remember to cover them with bulking material.

Don't throw anything non-degradable in the composting toilet, for example sanitary towels, plastic, rubber or chemicals.
